AODex

Privacy-First AI Workspace

"You don't have to be the product anymore."

THE CHALLENGE

Every major AI platform monetizes your data — free tiers train on your conversations, enterprise seats cost \$200+ with no real edge, and none of them remember your context between sessions.

THE SOLUTION

AODex is a privacy-first AI workspace with persistent memory, knowledge bases, custom personas, and **500+ AI models** — all routed through AOCore's AOSentry security layer, so your data never reaches a provider unprotected. Your conversations, context, and IP stay yours.

WHAT YOU GET

- ▶ **Multi-Model Chat** — 500+ models (GPT, Claude, Gemini, Llama, Mistral) through one gateway
- ▶ **Knowledge Base + RAG** — Ground answers in your documents with real, clickable citations
- ▶ **Team Collaboration** — Share personas, knowledge, and projects with granular access controls
- ▶ **Web Search & Fetch** — Real-time web access for current research and fact-checking
- ▶ **Persistent Memory** — Remembers your preferences, decisions, and project context across sessions
- ▶ **Configurable Personas** — 13+ specialized assistants tuned to role, voice, and domain
- ▶ **Image Generation** — Create visuals and diagrams without leaving the workspace
- ▶ **Full Data Export** — All conversations, memory, and knowledge in open, portable formats

WHY AOCYBER

- ◆ **Privacy by architecture** — PII is tokenized before it reaches any model, not after
- ◆ **Memory + knowledge graphs** at a depth no competitor combines
- ◆ **Self-hosted option** — ChatGPT, Claude, and Gemini are cloud-only
- ◆ **No free tier by design** — a business model aligned with protecting your data
